

Software Engineer with 13+ years of experience driving technical and business impact across startups and high-growth enterprises, including designing patent-pending software and re-architecting the core mobile platform for a #1 ranked app in the Apple App Store.

Work Experience

Senior Software Engineer <i>Coinbase Wallet/The Base App</i>	Coinbase	01/22 - 05/26
• Led full-stack refactor of Discovery tab, cutting content publishing time from 1 week to 1 minute and achieving 18 milliseconds total render time via data pre-fetching and list virtualization • Served as Tech Lead for a 6-person engineering team, managing product roadmaps, weekly operational excellence reviews, and growth initiatives to onboard 1M chat activated accounts within 6 months • Launched Solana swap deep links from the Coinbase retail app and resolved multi-chain asset enablement issues, capturing \$8.7M in volume and 11K trades in first three months • Designed a patent pending user flow, which enabled secure cross-device wallet imports for passkey-authenticated accounts; seamlessly integrated the experience into the core wallet onboarding flow		
Software Engineer <i>Coinbase Retail App</i>	Coinbase	05/20 - 01/22
• Core Team member of the React Native migration which reached #1 in the Apple App Store; owned core features like Earn (scaled 200K to 4M+ MTU's) and real-time prices, and developed security-focused native modules (Biometric/PIN security settings, Android keystore isolation) to support secure account migration • Architected and built a novel API to convert dynamic application content into shareable user generated content, driving a 4.8% sign-up conversion rate from shared assets and enabling 110K+ monthly creators		
Senior Engineer <i>HomeTurf</i>	Cantina Consulting	01/19 - 04/20
• Spearheaded the transformation of a React Native application from concept to the iOS and Android app stores in 90 days • Delivered a second screen experience that supplemented NFL games by serving contextual content such as: in-game media assets, select stadium performances, chat, trivia, polls, player and sports betting statistics • Integrated audio fingerprinting libraries, enabling users to synchronize their app experience with their broadcast delay		
Technical Consultant <i>Your Call Football</i>	Cantina Consulting	01/14 - 01/19
• Led development of a novel React Native application—where users vote to direct plays in a live football game—shortlisted for the 2019 Yahoo Sports Technology Awards, Best Technology for Fan Engagement Award • Implemented a low latency live-stream to facilitate real-time play selection without interrupting on field operations • Actualized a sharing paradigm that resulted in 62% of users sharing their game score or inviting others to play		
<i>FundVisualizer by Putnam Investments</i>		
• Developed interactive visualizations with D3.js to improve the user experience of a fund selection and comparison tool, which won the 2017 Media Post, Business Appy Award and the Fund Intelligence Best Mobile App Award • Optimized front-end resources and consolidated network requests to reduce the application's initial load time by 12%		
UI Developer	Boston Financial Data Services	10/13 - 11/14
• Implemented responsive design to deliver a device agnostic rebuild of the company's marketing website • Maintained 11 state run 529 college savings plan websites by developing new features, fixing reported bugs, and refactoring legacy code based on client needs		

Personal Projects

Freelance Consultant

Aaron Allan

01/11 - Present

- Provide client-tailored engineering services to startups and agencies including Maze Consulting, Gigster and Aquato (acquired by Mavenir)
- Foster long-term client partnerships through shared decision making and successful product delivery

Founder

Traditional Strings

09/08 - 11/13

- Created a Lacrosse apparel brand that generated \$6k annually and used a portion of proceeds to donate lacrosse sticks to underserved communities
- Developed an e-commerce website that accounted for 35% of revenue and tracked and displayed stick donation progress

Education

University of Massachusetts Boston

09/06 - 05/11

- BS, Management (concentration): Management Information Systems, Cum Laude
- Finalist in University Business Launch Competition
- University Lacrosse team, served as Captain for two years, played all four years

Skills

Languages: TypeScript, JavaScript (ES6+), Go, GraphQL, Kotlin, Swift

Frontend/Mobile: React, React Native, iOS & Android (Native Modules)

Backend/Cloud: Node.js, AWS, Firebase, Git

AI Engineering: Model Context Protocol (MCP), Claude Code
